

**Electronic signature tablets, devices and software for the capture, encryption, storage, and verification of electronic signatures in legally-binding electronic documents.**

Forensic-Quality signatures **plus** the patented tools and software to authenticate them.

**Advantages of The Topaz Electronic Signature Capture System:**

- 1) Each signature is encrypted to a specific file.
- 2) The signature can be subjected to non-repudiation testing from software tools that examine the forensic and biometric qualities of the signature. A court appointed forensic document examiner will be able to authenticate the signature.
- 3) **Bundled software, is free with all of our pads.** The software is maintained for free and also comes with free unlimited technical support.
- 4) **Support - Life time technical support is provided free of charge.**
- 5) State of the art hardware allows a choice of low cost pressure sensitive Sig Lite Series (one-year warranty) or rugged Sig Gem Series (three-year warranty).

**SigGem Series**

The most rugged tablet series, SignatureGem tablets utilize electromagnetic technology, with an active pen, to produce reliable and rugged signature capture systems for long-term, commercial grade applications. Comes with 3-year warranty.

**SigLite Series**

The most economical series, SigLite series tablets utilize a touch-sensitive technology to reduce cost, best used for consumer-grade applications in a lighter duty environment. Comes with 1-year warranty.

**LinkGem Series**

LinkGem is available as a handheld portable tablet or pneumatic canister for drive-up teller applications. This System is Patent-Pending and includes a drive-off alert system.

**ClipGem**

Portable Electronic Signature Solution for Full-sized Paper Forms. ClipGem comes as a letter or legal-sized electronic signature capture clipboard.

**Desk Gem**

DeskGem is an electronic signature capture pad that doubles as a mousepad to save desktop space.
